Rodin™ SCULPTURE

Zirconia Nanohybrid Resin

Rodin™ Sculpture 2.0 is the next monumental evolution of Pac-Dent's crown and bridge material. This zirconia-infused nanohybrid has been engineered to transcend the standards of permanent dental restorations. This next-generation resin achieves previously unseen levels of flexural strength and ceramic filler content, redefining what can be achieved through 3D printed restorations.

FEATURES & BENEFITS

Improved Strength

Improved Ceramic Filler Content

Improved Aesthetics

ADA Code D2740 Insurance Qualified

Highest Fracture & Wear Resistance

Matches Color of Dentition

Optimal Translucency

FDA 510K Cleared & Biocompatible

APPLICATIONS

Permanent Crowns

Bridges

Implants

Inlays & Onlays

Rodin Sculpture 2.0

- For temporary and permanent fixed restorations
- Improved Strength: Rodin™ Sculpture 2.0 boasts an impressive Biaxial Flexural Strength of 200 MPa
- Sculpture 2.0 now consists of over 60% ceramic filler content, providing a substantial increase in strength and superior X-ray radiopacity
- Class II Zirconia-Infused Ceramic Nanohybrid

Rodin Sculpture

- For single crowns, inlays, onlays, and veneers, denture tooth arches, all-on-x provisionals
- Rodin™ Sculpture features a Biaxial Flexural Strength of 175 MPa, and a Flexural Modulus of 8800
- Rodin Sculpture consists of over 50% ceramic filler content
- Class II Ceramic Nanohybrid

Rodin Titan

- For high impact prosthetic indications: (All on Xs, screw retained dentures, full arch denture teeth)
- Improved Flexibility: Rodin™ Titan features a significantly reduced flexural modulus, providing exceptionally high impact strength
- Rodin Titan features analogous ceramic filler content to Rodin Sculpture
- Class II Ceramic Nanohybrid

Rodin™ SCULPTURE

Zirconia Nanohybrid Resin

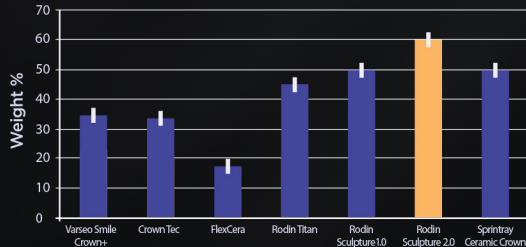

Biaxial Flexural Strength of Printed Tooth Materials After Aging*

The high biaxial flexural strength value of Sculpture 2.0 indicates high resistance to breakage over time

Weight % Content of Permanent Tooth Materials*

The high percentage of ceramic filler content in Sculpture 2.0 ensures maximum wear resistance and durability

Flexural Modulus of Permanent Tooth Materials*

The high flexural modulus value of Sculpture 2.0 indicates resistance to distortion, maintaining accuracy of fit

*Third party validation data provided by Dr. Russell Giordano of Boston University

“Analysis of Rodin Sculpture reveals a highly filled printable resin with good mechanical properties that actually meets the ADA criteria for classification as a ceramic restorative material. Nearly all other printable materials marketed as permanent restorations do not meet this standard.”

- Dr. Russell Giordano II, D.M.D., D.M.Sc. FADM, FADI, CAGS

COMPATIBLE PRINTERS: Pac-Dent has validated Rodin 3D Resin™ in workflows with these select printers.
